## Product Synopsis

“Airport Retail Trends in Asia-Pacific, 2012–2013” is a new report by Canadean that analyzes trends in airport retail and explores how opportunities and demand are set to change in 2012–2013. Furthermore, this report not only provides a comprehensive overview of customer visits and time spent at airport retail stores in 2012, but also showcases average expenditure. Additionally, it identifies average expenditure on food and beverages. This report identifies the product and purchasing trends at airport retail outlets, and the significance of websites in pre-planned purchases. In addition, this report outlines the key products that occupy the most airport retail space, and the survey analyzes the most popular products purchased by respondents at airport retail outlets. Furthermore, the report provides insight into the key drivers that help promote frequent visits and identifies the most important customer concerns in purchasing at duty-free outlets. The report also provides access to information categorized by age, gender, annual income, and travel frequency.
