Do you require Confined Space Training for your staff? by [Mary Porter](#)

Article published on June 18th 2012 | [Business](#)

Many people in a variety of work sectors and firms have to work in confined spaces, but this should not be attempted without the right confined space training. Confined space training is absolutely essential and can help to ensure that those working in small spaces are safe at all times and protected from the potential hazards of confined spaces.

If you need confined space training for your team then there are plenty of options to choose from. The right confined space training will be able to tackle the specific requirements of different firms, and will give employees the skills and knowledge they need to safely tackle jobs in restricted areas.

If you are interested in confined space training for your firm then visit us here at Civil Safety Engineering and talk to our team about your confined space training needs. We have been providing confined space training and other options for a decade and all of our staff have a wealth of experience in providing specific and bespoke confined space training.

Those coming to us for confined space training can choose from City and Guilds confined space training courses and our own in house confined space training. Many customers pick our own confined space training courses, and these popular confined space training options are open to anyone aged 16 or over who is medically fit.

Our day long confined space training includes interpretation of confined spaces, recognition of confined spaces, how to work safely in a restricted space, escape sets, tripods, winches, the safe use of gas detection equipment, the use of harnesses, ventilation equipment, how to properly communicate in confined spaces and manning levels for working in confined areas.

As well as this, our confined space training options include modules detailing current policies and relevant confined space training legislation.

If you are interested in confined space training then visit us here at Civil Safety Engineering and talk to our knowledgeable team about your confined space training needs. We are leading providers of confined space training and we can help equip your staff with the skills they need to work safely in enclosed spaces.
