How to Buy the Best Motor Scooters by [James Blee](#)

Article published on February 16th 2012 | [Business](#)

Possessing a motor scooter or an ATV at ones disposal proffers immense help in commuting short distances without problem. However, simple as it sounds, you might get flustered on seeing so many models or motor scooters or cheap ATV available when you actually go to buy one for yourself.. Here are some considerations that might help you decide on whether to go for motor scooters or ATVs and how to choose the best among them.

## The Size of the Motor Scooter

Motor scooters come in varied engine sizes which determine the speed of the vehicle. Thus you have sizes ranging from 50cc to 250 cc and even more at times, which are manufactured by certain companies only. The 50cc scooters possess an optimum speed of 35 to 40 miles per hour, 150cc ones can go 50 to 60 miles per hour, while 250cc motor scooters have an optimum speed of 75 miles and at times beyond..

## Answering the Questions

While choosing the right model of motor scooters for yourself, there are certain things you need to clarify before plunging into the buying spree. You need to decide your priorities as to whether you wish to go after speed or would rather be economic and save on the fuel or gas, whether you want to splurge on your scooter or keep the price low..

## Buying Cheap ATV

If you are however, of the adventurous sort and would be contented with awesome speeds, getting a cheap atv will be just the right decision for you. Cheap ATVs can be purchased as pre-used ones where you need to take a peek into every angle of the vehicle for any sort of rust or damages as well as enquire the retailer about accidents that the vehicle has net with and the type of maintenance that has been taken.
