Why MHT is a reputable company in energy saving products by [MHT Lighting](#)

Article published on July 30th 2012 | [Business](#)

MHT Lighting is a lead US manufacturer for energy efficient induction lighting. The company is known to use the highest quality. The company has the only manufacturing facility that has been certified by the ISO 9000/01 in USA. This means that every manufacturing procedure and quality control is performed before any product leaves the factory. The product has to be tested, burned in and inspected to make sure that it lasts the time that has been promised. You will find that this is totally different from other lightning companies in the market. The company has qualified staffs that are able to provide the engineering, the personalized solutions and project layouts for the industrial and commercial lightning needs.

MHT which stands for "Manufacturers of High Technology" vision is to make sure that it is the leading company in manufacturing energy efficient products in the US. The company is also known to be dedicated to its community, employees, customers and environment in general. The MHT lighting is more concerned about the future of this planet. This is why the company tries to implement the latest technology which has less negative effect on the environment while also preserving the natural resources.

The company strategy to stay relevant in this competitive global market is to make sure that their energy efficient systems employ the latest and greatest technology that reduces electricity. MHT buys only from the best companies that are able to provide only top quality components. The company reduces the cost at the same time it increases the energy efficiency.

The MHT management team understands the demand for energy efficient cost effective products that can outperform other products that are available at the market. With the rising of the energy costs, every body needs the products such as the SP1000, LED, and induction lighting which are long lasting with low maintenance needs while also having high optimal energy efficiency. The company is also looking for more expansion opportunities in different places.

The company's corporate headquarters are located in New York. The 55,000 square foot facility is an approved UL manufacturer in energy efficient lighting and energy efficiency "energy management systems. MHT is ISO 9000/01 certified NAFTA and AARA Buy American compliant. Now you can find the company product in Central America, South America, Mexico and United States.

MHT's energy efficient products are in high demand throughout North and South America. The company goes above and beyond to make sure that their products are of the highest quality components and design, while they attend to the customers' needs through customer service. When you buy the company product, you will get competitive price, quality service, individualized consulting for your project and the cutting edge technology.
