Female Brazilian Waxing, for the Wiser Women by [Cameron White](#)

Article published on March 5th 2012 | [Health](#)

San Diego is a great place to enjoy the beach. In fact it has some of the best beaches in the country. The lively and energetic atmosphere is simply outstanding. A beach is also one the best place to flaunt those well toned abs and bikinis. To be the envy of all eyes just having a perfect body is not enough. Grooming goes a long way in creating a lasting impression. Hair removal is one the most important aspects of grooming. Though there are various techniques of hair removal the fastest, easiest and most reliable way is the waxing technique. There are hundreds of salons for both men and women that offer this hair removal services but Women Waxing in San Diego is known to the best. This place is best known for its female Brazilian waxing. Many people think of this hair removal as a very painful experience, especially for the first timers. On the contrary it has more advantages than we think.

Getting a Brazilian wax is more to do with your mental preparedness than physical. Before you decide to get it done you need to be sure about it. For the first timers a standard bikini wax is ideal. In this type the hair from the bikini line or in some cases hair from the full bikini area is removed. Most of the pubic hair is removed, leaving the hair from the very sensitive areas. A proper Female Brazilian Waxing technique will remove all hair for the pubic region. Women Waxing in San Diego offers the best of the hair removal services.

The first Brazilian wax should ideally be done under a professional. There are many women who try it themselves and end up damaging the skin in the bikini area. To avoid any damage it is best that you consider this hair removal service only at professional salons. To find a good salon you can search the yellow pages of that particular city or area. Recommendations by friends or family also are some of the best ways to find a good salon.

As waxing in itself can be a bit painful it is important that you be in a good mood before you undergo this hair removal treatment. Try taking a warm shower and keep your spirit lifted.

Usually for this kind of waxing a separate room is reserved. The best position for this technique is either lying on the bed with your knees up or your legs down.

The therapist will then trim the pubic hair with the help of a scissors. The ideal length of hair is about quarter of an inch.

After you are in a comfortable position, a low temperature wax is applied. It is left for a few seconds till it cools down. Clean strips are then pressed against the area and then swiftly pulled out. This action pulls out all the pubic hair in the area leaving the skin totally hair free. Thought for the first timer, having a stinging pain is absolutely normal, but as you have more sessions the pain become lesser.
