Today's markets are pounded with the teeth whitening products. And it is not as there are one of two product types, but there is a massive variety of such teeth whitening products that is available in the market. Today people are taking keen interest in improving their smile and have whiter teeth. If you are just confronting with dilemma as to go with which teeth whitening products, make sure you end up searching with the best one available in the market. For that you can consult some good dentist and he can help you find the right teeth whitening product.

One of the popular teeth whitening option today is zoom chairside teeth whitening.

Zoom teeth whitening is an in office teeth whitening system that aims to restore dark stained teeth to their original brightness. With the passage of time teeth tend to develop darkness or our lifestyle choices and oral hygiene habits can even affect our teeth health. And zoom teeth whitening system is supposed to lift years of darkening and make teeth pearly white.

Besides the person is attended by some very professional and experienced teeth whitening expert, zoom teeth whitening system comes with an exclusive range of products. This is most importantly a safe way to clear teeth plaque. Teeth whitening gel works optimally with the pulse light and all the products are disposable, so there is no fear of contamination.

The main components of zoom teeth whitening system are the bleaching agent and pulse light. The bleaching gel comprises of 32% hydrogen peroxide base with zoom proprietary activating ingredient. On the whole this mixture is a teeth whitening gel with 25% hydrogen peroxide with pH level between 7.5 to 9.

While the pulse light is a mercury metal halide light that produces violet light with wavelength 350 to 700nm. It also comes with infrared filters to reduce heat emissions.

When you go for teeth whitening your dentist will apply the teeth whitening gel on both upper and lower sides and after that will train the pulse light in your mouth. Within just fifteen minutes the treatment phase is over. A person has to undergo this kind of treatment for a maximum of three times. In short the whole treatment will go as long as for an hour including the before and after time needed for preparation. And generally the whole treatment finishes up in a single session.

Probably this is the reason why it is considered the fastest way to have whiter teeth. If you are opting for zoom teeth whitening system, certainly you have chosen the most effective and quickest way to lighten your teeth. It guarantees positive results and one can see the remarkable difference with before and after pictures. When done in the correct manner and by the very experienced and knowledgeable dentist, you can make sure you have white teeth.

Looking for a smile makeover you can also go with at home teeth whitening products if price is the restriction before you. They are an affordable way to clear plaque.
