Choose to live in style when you buy our home embroidery supplies which will offer you comfort combined with lasting quality. Embroidery is very popular in today's fashion scene. In fact, everyone in the public limelight is looking fabulous when using an embroidered product as they can showcase its beauty and fragility.

The bootylicious Beyonce dazzled onlookers at the Met Gala celebrations when she wore a Givenchy Haute Couture dress. This was designed by Riccardo Tisci which was made up of feathers and black embroidery that took a total of 350 hours to make! Proving that excellence can take time, the sheer detail of the embroidery amazed many fashionistas and allowed Beyonce to make the grand entrance that she was hoping for. Although most of the recent news has centred on her stunning baby Blue Ivy, Beyonce showed everyone that she's still got it and proved this with embroidery at the party event of the year.

Embroidery was also praised at L.A. Fashion Week who cited it as an essential summer apparel trend. Using this trend, companies can create a new celebrity style for each customer by embellishing their merchandise with embroidered designs. Customers can keep up with the latest fashion as well as be cool during the hot summer months while companies can be encouraged to create unique fashionable items and maintain the environment. For instance, metallic embroidery can be combined with eco - friendly fabrics such as bamboo and hemp to create an exciting, trendsetting product.
