Moving from one blind shop to the other in order to buy your made to measure blinds is an old idea. In the modern times you can buy the best set of made to measure blinds sitting in the comforts of your home. Various online stores have made this possible. Some advantages of making purchases online include:

• Made to measure blinds have to be fitted into the window by you. This is not a simple task. But your work can be shortened as the blinds will be perfect fit for the window frame.

• Though many physical stores have a large range of made to measure blinds but the online stores are flooded with hundreds of different colours and patterns to choose from.

• Most reputed stores offer free shipping on online orders and you can get good discounts for placing orders too.

But popularity of online blinds buying has led to cropping up of various online blinds stores. Every company makes tall claims in their marketing campaigns but you have to decide which online blinds store can deliver the best quality of made to measure blinds that meet your needs. There are wide range of blinds available with these stores and at affordable prices too. But there are certain points which are worth considering before you place an order for made to measure blinds. When you are looking to place order for made to measure blinds you need to make sure that the measurements sent to the online store are perfect. So make sure you have followed the below given steps:

• First of all read through the measuring instructions provided at the website.

• Arrange for all necessary equipments required to measure your window for made to measure blinds. You would require equipments such as a good quality steel measuring tape (which will ensure measurements are accurate), pencil and paper (to write down the measurements instantaneously).

• Ask a family member or friend to help you when you are taking the measurements.

• Normally people like the outside mounted blinds as the moulding around is not attractive. If you intend to opt for the outside mounted blinds then you should decide how much large made to measure blinds should be then your window. While measuring for outside mounted blinds you will need to take note of any major obstructions.

• Leave about two inches of space at the top, bottom and sides of the window for fitting the blinds. Such blinds have to be fitted on the outer half of the casement. Add some more inches to provide a good overlapping to the window. This will avoid any obstructions. Remember the made to measure blinds you install should provide adequate privacy but they should also allow sufficient amount of light into the rooms.

After you have taken proper measurements for your room ask for price quotations. You can have other friends take the measurements individually to cross check your accuracy. Buying made to measure blinds is more costly than any other types of blinds, so you do not want to receive an ineffective blind.
