What you should Learn About Wooden Shakes and Shingles by [Adam](#)

Article published on March 6th 2012 | [Home Improvement](#)

When it comes to aesthetics, only some can be likened to the natural wonder of wooden shakes and shingles. Western red cedar is usually utilized for most wooden shakes and shingles, but one can also acquire pine and eastern cedar variants. If you search patiently enough, you might even stumble across some wooden shakes or shingles created from oak, redwood, and cypress.

Produced from hunks of wood, wooden shingles are made smooth and normally come in lengths of 16, 18, and 24 inches. Wooden shakes, conversely, are a tad thicker but also cut in similar sizes as wooden shingles. Wooden shakes come in two different weight classes: medium and heavy. They may be cut into three various styles: the hand split, hand split and cut and the taper split. These wooden shake alternatives compose most of the wooden roofs you will find all over the country.

Wooden shingles and shakes come in several various grades.

Nevertheless, if you like the most excellent quality grade there is, consult your roofing contractor for “blue label” shingles and shakes. These blue labeled roofing goods are made from straight-grained heartwood from the sapless part of a tree. These shingles and shakes are superior with regards to wooden roofing. With proper care, they last for quite a long time, even in humid conditions.

One of the major fears of homeowners is the danger that wooden shingles and shakes can easily catch fire. Sadly, if untreated, they are. Nevertheless, most shingles and shakes in the open market today are already treated with fire-resistant chemicals and solutions to keep at bay molds, mildew and insects. When building or renovating your home, make sure to consult your local Alexandria roofing company whether treated wooden shingles and shakes are available.

Wooden shakes and shingles also come in ornamental options which are supplied by your local roofing company. These ornamental shingles and shakes have attractive designs, shapes, and patterns to complement your home’s architecture. They are usually installed on the exterior walls of homes and even incorporated into Northern Virginia siding for a more visually pleasant result.

For a trendy, simple, elegant, and natural look, why not opt for wooden shingles or shakes supplied by your local Arlington roofing company? Homeowners can rest easy, realizing that they are fire and bug resistant. Waking up in the middle of the night with your roof on fire is a remote possibility. See the difference today and spend time in a lovelier home.
