E-libraries â€” the store house of huge amount of data [Byather Protz](#)

Article published on April 24th 2012 | [Others](#)

Earlier we used to visit libraries for a number of reasons. With the arrival of the digital era, there comes a change in the lifestyle and practice. We reduced our visit to libraries. This is not because we stopped reading. Most of the houses have a television and an Internet connection. The introduction of the Internet opened a new world of technology.

Most of the people surf on the web to collect data and find the right information. The digital library is one of the greatest achievements of the technology. The digital library stores data in the form of text, images, sounds and animations. This will help people to read data, hear data and watch live series.

While conventional books occupy lots of space, e-books are really easy to maintain. We can store thousands of e-books in our laptop or other personal storage devices. You can buy e-books or download it from the websites. Most of the websites offer free e-books. Maintaining a traditional library or an e-library which one is more convenient? Of course, you will say digital library. What are the advantages of an e-library?

Retrieve books without wasting time- Instead of going to traditional library and buying a book, we can download it from websites within minutes. We can buy a number of books from the electronic library free of cost or for a nominal fee.

Easy to search books - Some of the specialized library softwareâ€™s available in the market can be used for making the searching process faster and more effective. By entering the title, author and publication year you can find the book without any difficulty. E-library software aids you in narrowing your searches. You will also get an opportunity to select the exact book from a group.

Interactive searches â€” If the particular book you are searching in the e-library is not available you can go for e-journals, blogs and directories. Most of the journals and blogs give options to comment on the content and chatting options. Some directories even give e-mail contacts. Thus you can make your reading experience more interactive. Still you are not satisfied! Then write an article and post it on the blog or directory. You can call it as a â€”give and takeâ€™ action.

Useful links- While you are searching for a particular topic, you can find links related to it. Some of those links can provide you valuable information. It is always advisable to check links whenever you look for particular information. You should make sure that you are clicking on the correct hyperlink.

Making your own digital library â€” The latest technologies can help you in creating your own digital library. Most of the e-libraries offer exclusive books on a large range of topics. With a single click of the mouse you can download as many books you want within no time and can become the owner of a library. One of the strongest desires of man is learning and improving himself, and e-libraries can assist in fulfilling that goal.

Inexpensive and flexible â€” Most of the books found online can be downloaded for free of cost. But some websites charge a nominal fee. When compared to traditional libraries, the books available in e-libraries are inexpensive. Moreover, e-library offers flexible readability. We can read books online or take a printout and read it later. This helps those people who canâ€™t read computer screens.

People who are using the e-library service are increasing day after day. By having a good internet connection from companies like Xfinity Internet can support the growth of the libraries. There are

strong reasons behind the growth and popularity of the service. Books stored in the e-library can be used by generations. We can call e-libraries as the best medium to preserve information.
