Use Electric Bikes and Save Our Environment by [Micheal Nielsen](#)

Article published on April 21st 2012 | [Travel](#)

Every citizen have some responsibilities towards the environment, but people always feel how to contribute in it? One very common and easy contribution from humankind can be, using electric bikes. These bikes use an electric motor which further helps in making the motor run. These bikes also use the rechargeable batteries that can easily help a bike to travel up to 20 miles. These bikes are gaining popularity very fast and also they are replacing the old one's. The best part is that they are very much environment friendly and that's the reason these bikes are known as the safest in the world.

You can count plethora of benefits of using this bike and the most known one is the fact that it makes climbing hills very easy. Also they do not emit harmful carbon emissions and do not use fuel to run. Many people think that it is not a performer but its a myth, the electric bikes travel faster therefore you are able to cover longer distances in short periods of time. Last but not the least, they are cheaper than the traditional bikes because these bikes just demands initial investment and the maintenance cost is almost negligible.

Green technology is really helpful in the development of electric bikes. You might feel that these bikes are not as fast as the traditional bikes are, but the positive point is that it has capability to protect the surroundings by cutting down on fossil fuels that are generally being emitted every day in the surroundings. One more reason why it is beneficial is that it does not demand petrol, as we all know rate of oil is traveling towards north so we really need to come up with some other alternative. Buying electric bike is about only gain and no loss.

The plus point of these bikes are that they are highly environment friendly so they are the perfect option to choose as daily conveyance. Also they are the best way to stay healthy with daily workout. In such a tight financial time these bikes are truly an intelligent choice, they can surely give you bang for your buck and simultaneously helping the environment.
