6 powerful networking tips with the use of Business Cards by [Myprintwall](#)

Article published on June 5th 2012 | [Advertising](#)

Whether you are into the Professional field, creative field or any other, you always need a Business card. This small paper defines your character, your image and your business. Your card is your identity for life. Lets presume a business card is the face of your business and you are the body. Can the body ever be complete without the face? On the other hand an ugly face wouldn't give the same effect as the attractive one. Here are some examples to prove a visiting card can increase your business opportunity.

## 1. Dont leave without your visiting card:

As I said above, a body would be incomplete without a face! What if you meet an old friend on the way and you don't have a Visiting card? How embarrassing and unprofessional it would be! Always make it a point to keep a few cards in your wallet. It is one the best and most effective marketing tool.

## 2. Attach your card in emails or billing payments:

Everyone has some major contacts. Each of us knows someone, who knows someone, who knows someone etc. Developing this powerful networking attitude will be a fundamental source of continued success. So inserting your Business card may be a great tool for marketing your brand.

## 3. Use business card etiquette:

When you give your card, ask for their card too. When you take the card, have a glance at it. Make the opposite person feel that he is important. Keep your visiting card attractive so that the person glances at it too.

## 4. Give out more Business cards:

Give your card to everyone. Hoarding your business cards only makes your wallet feel full, not your bank account. Print more cards and distribute even more. The most effective way to expand your business is to distribute more and more Visiting cards.

## 5. Ask Your friends or clients for referrals:

When you are handing your card to someone, it is always advisable to ask "I would appreciate a referral if you know anyone who needs my services". People naturally like to do favours for others. This always places you in a better position with them. They will feel better about helping you.

## 6. Give your company a witty slogan:

Print a slogan on your card that makes others feel you are superior from the others in your field. Give them a reason why they should hire your services. A slogan that represents your confidence and your intelligence would take you way ahead in your field. As they say, "Confidence is the key to success" but if you are not present let your card be the medium of your confidence!

Let us sum this by quoting, "Let your Business card be the key to your success".
