Demo Tents & Banner Stands in Hyderabad by [David Raju](#)

Article published on August 22nd 2012 | [Advertising](#)

A demo tent really promotes your brand and expends its image among audience. The idea is preferred by several companies looking for show off to their product and services. You can use them for road shows, trade fairs, and other similar activities. The Demo Tent also remains water proof as we use of quality fabric for making them. The packing, unpacking and installation of these demo tents are also so easy.

Over the years, these demo tents are successfully used by marketing department of various segments such as banking, insurance, colleges, IT, FMGG, mobile, schools, pesticides, insecticides, home loans, newspapers, food & beverages, books, and magazines.

Demo tents in Hyderabad can also provide these Demo Tents in different size, color and design options as requested by clients. These are truly great way of creative, cheap and best promotion for a product and service

These are manufactured using fine Textron and aluminum fittings with flex, these are offered in portable bags of weight 10 to 12 kilograms. Pitching" is a term meaning "building" or "putting up" a tent. Follow these simple camping instructions regarding pitching your tent and you will have a tent up and ready in no time at all.

1. First of all it is important to locate flat ground for pitching your tent. A slight inclination will be good in wet rainy seasons so water will not accumulate under and around the tent.
2. To prevent water from getting into the tent as well as protects the tent from damage from the stones and other elements that may cause some damage to the tent, trap cloth is important.
3. Many tents are supplied with "stacks". These are pegs that need to be hammered into the ground with a rock and the tent is secured to these with ropes. This will ensure that the tent will not blow away with the wind leaving you without cover.
4. For your business needs, we provide advertising and marketing by Banner stands in Hyderabad. So that it can helpful for your business.
5. When you set up your tent remember to dig a six inch trench around the tent and bury the lower parts of the tent in it. This will prevent the creepy crawlies from entering the tent while you sleep.
