Dermalogica Daily Microfoliant: the universal skin care by [MarjBeauty](#)

Article published on April 18th 2012 | [Business](#)

Beauty is a virtue that ought to be defended at all costs. It's for this reason that many products are available in the market that can aid you to reclaim and preserve your beauty. This in dermatology or skin care is complicated by the fact that many products are targeted to specific skin types such as dry skin, oily skin, pigmented skin, sensitive skin, and all other skin variants that are known. Hence, general usage of these may not deliver results especially if the skin is not the one targeted. Besides this, individuals with sensitive skin may have allergic reactions to skin care solutions which are not friendly to their skin types. Such scenarios often take place in many households since the members may not all have one skin type thus forcing the dominant members of the family to decide on the skin care product choice.

Fortunately, Dermalogica, a US based skin care manufacturer foresaw this problem and has a solution that is good for all skin conditions. Dermalogica daily Microfoliant is the perfect answer to all types of skin be it sensitive skin, dry skin, oily skin or any other skin type. This is because Daily Microfoliant is gentle for all types of skin and can be used daily without causing any harm. Daily Microfoliant helps in removing the dead, dull, surface skin debris in order to reveal brighter, smoother underlying skin. This process is actually natural since we usually shed off outer dead layer every few days and these get replaced by younger smoother underlying skin. However, this process is slow and uneven but Daily Microfoliant helps to synchronize the process on all skin surfaces hence making the overall skin feel much smoother and even. Daily Microfoliant also helps the skin renewal process, balancing uneven pigmentation of the skin which may result from burns, chemical effect or other ailments such as chicken pox. Lastly, Daily Microfoliant provides the perfect day time remedy just as Daily Resurfacer, another product from Dermalogica whose full description can be obtained by searching Dermalogica Products Online.

Daily Microfoliant is able to achieve all this because it contains active ingredients such as rice bran and rice extract which gently exfoliate the skin's surface, hence, easing the penetration of the brightening agents. In addition, Daily Microfoliant contains Papain and Salicylic acid which has been proven to help in removal of excess skin surface cells. Furthermore, other than rice, it contains extracts from licorice and grapefruit which are known to help in making the skin brighter and distributing an even skin tone.

The recommended way of applying the Daily Microfoliant is to put about a teaspoonful into wet hands and rubbing them together to create a creamy paste. After which, Daily Microfoliant is applied to skin while cautiously avoiding the eyes as the Microfoliant tends to cause eye irritation in some individuals. After massaging the paste on the face for one minute, you should rinse the skin thoroughly with preferably warm water.

It is recommended that after applying Daily Microfoliant, you follow it up with Multi-Active Toner or Soothing Protection Spray and prescribed Dermalogica Moisturiser.
