Designer Bathroom Tiles- for a Beautiful Bathroom Decor by [Julia Roger](#)

Article published on August 22nd 2012 | [Business](#)

Tiles are generally referred to a piece that is manufactured from a hard wearing material. Those hard wearing material can be ceramic, stone, metal or even glass as well. These tiles are heavy and find their application in roofs, walls, table tops etc. There is a lighter counterpart of these heavy tiles that are made up of perlite, wood, mineral wool etc.

These tiles are generally lighter in weight and generally find its application in the fine carvings and designs on walls and ceilings. Floor covering made of different materials have different use or applications. Ceramic tiles are mainly used to manufacture earthenware, stoneware, porcelain ware etc. The ceramic tiles are generally well designed and hence they find their application in the designer ware manufacturing.

The tiles that are used in roofs, wall, floors and ceilings are hard and long lasting. Though these tiles are made up of hard material you can customize these tiles with designs of your choice.

Roof tiles are generally manufactured in such a way that it should keep the rain water away and does not leak during the rainy season. The traditional roof tiles are made up of clay or slate. In the modern days, the floor covering in the urban area is made up of concrete or plastic. As the days are passing the styles and types of tiles are also getting evolved. The floor covering are again different from that roof or any other.

Since the floor is always exposed to most rough usage these are generally hardy. Though these are floor coverings, bathroom tiles are something special since these are exposed to the maximum threat of water every day. The bathroom tiles have a waterproof glaze which repels out the water from being soaked by the floor.
