Enhancing the Business Work Flow Substantially via BlackBerry Enterprise Server by [Samantha Cole](#)

Article published on March 9th 2012 | [Business](#)

It's only normal to find a business or company that operates the BlackBerry Enterprise Server software. This software has turned into an integral part in guaranteeing an organized and secure workflow for any business or company that uses it. BlackBerry has recently introduced the latest variant, the BlackBerry Enterprise Server (BES) Express 5.0. Maybe it's time that you view the various perks that BlackBerry Enterprise Server Express software can provide you and your business.

BES Express 5.0 provides you not only with an exceptional access to your work contacts, calendar, and email, but also provides you and your IT department a highly stable and easy to operate wireless solution to your daily business transactions. BlackBerry can be acquired for free if you currently have an Internet-capable BlackBerry service plan, and you no longer have to spend for any extra software license fees for your company. Moreover, you won't need to pay any additional fees per month. The bills you pay per month for your wireless provider will also incorporate your BES services.

**BES Express 5.0 Requirements.** For an end user to use (BES) Express 5.0, he will need two requirements: 1) a Blackberry smartphone and 2) a subscription to an Internet-capable BlackBerry service plan. A business IT officer will require 1) the latest version of Microsoft Exchange or Windows Small Business 2) to download and set up the BES Express software on the previously mentioned software. If you're an end user, your IT officer will simply add your BlackBerry smartphone into the system so you can start to use the service.

**BES Express 5.0 Features.** BlackBerry Enterprise Server 5 has developed business email features that allow you to connect your work email account to a highly safe business email system. It is also possible to synchronize your BlackBerry inbox to the inboxes of your other email accounts so you won't have to handle two inboxes. An email removed from your BlackBerry will be removed from your other inbox as well.

BlackBerry Enterprise Server Express 5.0 also has advanced calendar features. It will be easy for you to view or download your calendar attachments as well as send them to your colleagues. You can also look at your co-worker's status if they're working or free for the moment. This makes setting up your meetings relatively easy.

If you've finally decided to purchase the BlackBerry Enterprise Server v5.0 for you and your business, feel free to ask your wireless provider about it now.
