New-Type Office Rentals in Hyderabad by [Vincentpi](#)

Article published on August 16th 2012 | [Business](#)

As the capital of the Indian state of Andhra Pradesh, Hyderabad is located on the banks of the Musi River in the Deccan Plateau in southern India. Now, Hyderabad is the fourth most populous city and the sixth most populous urban agglomeration in India. As a growing metropolitan city in a developing country, more and more people start doing business in Hyderabad. When you want to set up a company with low start-up costs in Hyderabad, a serviced office is your first choice.

As the development of economy, a number of new demands have appeared in the market, which can't be fulfilled by a traditional office. Upon this background, a new kind of office rentals called serviced office rentals has appeared to free office users from the limitations of a traditional office. Compared with the traditional office, the new kind of office rentals in Hyderabad has the following features:

To begin with, it requires you to pay an all-inclusive bill. In the traditional office, you have to pay monthly for some common charges, such as the office rental, the electricity and water and property management. In contrast, you just pay a bill, including all the charges at a time before using the new kind of offices.

And then, it offers private, shared or open-plan workspace with 24-hour secure access. The traditional office is always rented only for private use. However, the new kind of office rentals in Hyderabad not only offers private rental, but provides shared rental, which will let many companies share an office and save a lot of money. And it is required that anyone who enter the office building should show the employee identification, ensuring the safety of the office.

Furthermore, it offers a fully-equipped, customisable office space with the latest technology. In terms of a traditional office, you have to make a big budget for the office facilities. However, the new kind of office is already equipped with the required office facilities, so you can save a large sum of money. In addition, it can be redecorated as what you demand with the advanced technology. So, it allows you to get down to business after you rent the office.

At last, it has organized a helpful centre team to provide you with dedicated specialist support. Unlike traditional office, it offers several featured services, such as high-quality secretarial service, call answering service, in house IT service, and so on. So, it may propel the development of your business significantly.

All in all, the new kind of office rentals in Hyderabad is a groundbreaking innovation on the basis of the traditional office rentals. It provides an office space that is in line with your exact business needs, as well as your budget. Due to its all sorts of advantages, this new form of office rental is gaining popularity in Hyderabad.
