How to Carry out T Shirt Printing by [Yogita Bali](#)

Article published on December 15th 2011 | [Clothing](#)

A variety of t shirt designs are found in the market. These t shirts come in different types of colors, shapes and sizes. When you are planning to wear t shirts you should always put on something which is very trendy. These smart looking t shirts enhance your style statement in every way. T shirt printing is certainly an art and various types of techniques are involved in it. With the advent of modern and innovative trends in printing, bulk t shirt orders can be placed. You can get the t shirts designed and printed within a very short period of time.

Among the various printing techniques which have emerged popular in the market, screen printing is one of the most modern methods. A variety of pre-requisites are associated with screen printing and you always need to keep them ready. The fabric ink is one of the most essential items which is needed for the purpose. Without the presence of this ink, the screen printing procedure cannot be completed in any way. The second item which you need for the purpose is the screen itself.

Different types of readymade screens are available in the market. You can pick them up instantly as per requirement. The other items which form an essential aspect of the requirement are plain paper, knife, masking tape and cotton t shirt. When you want to go ahead with the process of screen printing of t shirts, a number of methods needs to be followed one after the other. You need to cut or shape the design structure in such a way that it looks quite impressive.

You can opt for a diamond or triangle shaped t shirt design which certainly helps in creating an impression of its own. When you are dealing with the screen, you just need to mask the edges appropriately. When the stencil paper is laid on the fabric, you would not find any type of mesh whatsoever. The t shirt on which you want to print the design needs to be laid on the paper stencil. The screen always needs to be on the top and you should keep a very close look at it. The ink which is a part of the item collection needs to be put on the screen edge. You need to lift up the screen if you want the t shirt printing design to show up appropriately.
