Will the Inflation Occur in TERA Gold ? by [Mark Brown](#)

Article published on April 3rd 2012 | [Computer](#)

TERA Online or The Exiled Realm of Arboera is the MMORPG that gamers all over the world keep their eyes on. It is going to release this coming May 2012. There are many hot issues being talked about this game. One of the topic is about one of the most importance factor in all games in MMORPG, gold. Since 99.99% this kind of games, gold is always less value day by day, and item, armor gear, and weapon price is rising limitlessly. Finally, the inflation happens. Thus, a lot of players in the Tera Community are worried about the possible inflation in Tera Gold. My friends are always asking, "Will the inflation occur in TERA Gold Prices?" A lot of them don't have the time to grind all day for the gold they need, so they need to be able to buy TERA gold. TERA gold prices have been very fair since the game opened recently, but as the game gets more popular, everyone worries that TERA RMT prices will skyrocket and some will be unable to afford the extra gold they need to be competitive.

To cause inflation, there must suddenly be a lot more demand than there is supply. This can be caused be a few things, but the easiest way to make the case is by comparison. So, will the inflation occur in TERA Online gold? It is difficult to say for sure, but I would argue no, it won't. People are always comparing MMORPG's to World of Warcraft. Of course, since it is so popular, a lot of games now feel a lot like World of Warcraft as developers try to copy its success, but there is always one major difference. World of Warcraft was a massive hit that grew beyond what anyone thought was possible. Now TERA is popular and growing quickly, but it is not the kind of insane, explosive growth that made WoW such an awakening for the industry. This crazy growth is what caused such an inflation in WoW gold prices. The huge growth of new players trying to catch up to all of the original players is what caused such inflation. TERA is growing much more evenly, and a random explosion of growth is less likely now that so many people have been exposed to MMORPGs. So while TERA is growing every day, it is unlikely that there will be a massive spike of inflation in TERA Gold Economy.

So will the inflation occur in TERA Gold Prices? It is very unlikely. Prices might rise slightly as the game gets more popular and adds more content that people can spend gold on, but this usually balances out but older players saving gold or having already bought most of what they can buy with gold. Of course, it is usually prudent to buy early when can be pretty sure that prices are going up, so you may want to buy sooner rather than later, as prices can and will rise as the game grows. Good luck!
