Cheap Spy Cameras and its benefits by [Milla Howse](#)

Article published on February 21st 2012 | [Customer Service](#)

People have been using cameras for decades. Spy Camera or Hidden Camera is a type of camera. It is very small in size and can be fitted anywhere in the room or hall to record the things which are running over there. Generally, it is used to detect unauthorized activities like “ theft or any criminal activities. Some of the businessmen use it to run their business smoothly.

Spy Cameras are used by Government agencies like CIA or detective agencies to find the facts and truth. The spy cameras used by these agencies are a little bit costly, so everyone can not buy it. But, when we think over the requirements, it is very clear that a simple user does not require such expensive and high sensitive cameras. Thinking over the requirements of general users, we have manufactured these four types of spy cameras which are very cheap and suitable for the needs of average users.

1. The screw camera – It can be fitted anywhere in the room or hall where there is a screw and nobody will ever notice that there's actually a mini spy camera hidden inside it. The best version is a wireless spy camera which includes a twelve hour battery pack that's rechargeable and requires no wires or cords to plug-in.
2. The button camera – It includes 6 buttons altogether so you can re-do buttons on a shirt with one of the buttons that has a spy camera inside. The button camera has also version of wireless mini spy camera which is absolutely the best with a ten hour rechargeable battery pack. It is indeed a perfect camera to record the mobility in the room.
3. Wall Clock hidden camera – This is the most common and an advanced spy small camera types. It is one of the most demandable hidden cameras in the market today. It is just like a standard quartz wall clock. Some options include black-and-white or color transmission. It can be wired or wireless. The wireless models include a 2.4 to 2.8 GHz receiver to get the pictures and of course there's a transmitter inside to send the video.
4. The baby monitor camera – It is a must device for new mothers. It is just like a cute little toy or cuddly dog with a hidden camera inside that transmits signals to a hand-held portable LCD monitor that you can carry around the house. This does not record. But it allows you to see what's going on wherever the puppy dog is.
