Candida Diet Information by [Samuel](#)

Article published on August 10th 2012 | [Fitness](#)

The essence of being healthy or going on a diet is a need. But how many are able to go for a high carbohydrate diet. Seemingly, very few will have the passion or feel the necessity of doing so. But for others lie the excruciating pain due to irritable bowel syndrome and candida infection. Now when you are stuck up in such extreme pain and suffering from an unavoidable infection, dieting will turn out to be a thing of the past.

Forget the misconception that this candida syndrome is applicable to adults, as even children are subjected to it. Have you ever noticed your child getting tired or drowsy constantly? Has your child depicting any mood swing? Is he or she suffering from abdominal pain or indigestion? Well, if the answer to the question is affirmative, then you have got a yeast infection in your hand. And a yeast infection for a child means tons of hours spend in taking care of the child.

Let us check out what this Candida cleanse disease is all about. This candida yeast or candida albican yeast is nothing but an organism present in our stomach and digestive organs. Basically it is used to keep a check on the immune system. Nevertheless, any kind of weakening of the immune system or bacterial defense helps the yeast to grow rapidly. This fast growth along with the more prone bacterial defense, will lead to a series of irritating and painful conditions.

The symptoms for candida disease are numerous. You can almost say that the condition can manifest itself in many ways. You can suffer from normal symptoms like constant fatigue especially getting up in the morning, dizziness, bloating, abdominal pain, indigestion, and the list goes on and on. For some people, symptoms have ranged from the presences of white color on the tongue, gaining weight to itches, rashes, etc. In short, if you ever see any of your family members or friends exhibiting such condition, immediately take them to a doctor. However, many of the physicians fail to recognize and diagnose the symptoms of candida disease.

Candida cleanse diet consist of taking a large quantity of organically grown salads and steamed vegetables. Frankly, the candida diet is also fruitful and ideal for irritable bowel syndrome sufferers. Well! It does remove those foods which are common irritants and known to cause allergic reactions in the body.
