India has emerged one of the biggest outsourcing markets in the world over the past few years. There is a huge number of educated youth in the country who is diversely talented and has no problem with the international language unlike China. The western countries and especially the English speaking ones thus get the opportunity to find cheap skilled and semi skilled labour from India.

Online medical transcription services have become very popular in the last few years with the growing demands of the data management and storage and the dynamics of the healthcare industry. India has some of the best online medical transcription services available at very reasonable rates. There are a number of transcription specialists available in India which are hired by these medical transcription companies.

Skilled transcriptionists with good knowledge in all the areas of medicine are available in India. They use the latest technology to provide their services and with the increasing number of single doctors, small teams of practitioners running their clinics, hospitals and large health care centers, they stay updated with the technological advancements to provide the best solutions to their clients. Generally, the medical transcription service providers in India are suited for large companies where a large amount of data needs to be managed.

The following types of data can be transcribed from the medical transcription services in India:

1. Operative Notes
2. Summary of Discharge
3. Progress Notes
4. Billings
5. SOAP notes
6. Letters
7. Telephone Consultations
8. Consultations
9. Independent Medical Evaluation
10. Initial Evaluation and Management
11. History of Treatment and Physical Notes

The medical transcription companies use secure internet connections for handling the dictations or voice files for documentation. One can easily ask the company for the security tools that it employs in its work. The four most common areas to look for are

• Administrative Procedures

â€¢Physical Safeguards

â€¢Security Mechanisms

â€¢Security Services
