Article published on January 24th 2012 | [Health](#)

Face is most important part of a human body since it is one of the most visible parts of body. The face is the feature which best describes a person.

So if it contains any deformities, then this gives rise to certain beliefs, like for example, the large and long nose gives the idea as being aged and dormant. Person with the Droopy nose is assumed to be of wicked personality. There is an advantage for those having a well shaped and well symmetrical nose as it signifies the modesty.

New look for you:

Nose job surgery ny is the nose cosmetic surgery which helps to reshape the nose. This method of nose improvement or nose surgery is one of the best cosmetic surgeries which improve the nose features. It improves the appearance of your nose which is due to the hereditary. This surgery is useful to reshape the nose according to the one's own facial appearance. This surgery is usually done to increase or decrease the size of nose tip and also to narrow down the nostrils which are very wide.

There are certain conditions before taking the nose surgery and these have lot to do with the person's age, height, skin type and ethnicity. The minimum requirement of the age for the surgery is 16 years and is only done unless and until the crooked nose causing breathing problems.

Nose Job Surgery NY - Shaping your nose:

The Nose job surgery NY (nose surgery or nose improvement) is usually done to enhance the facial appearance. This surgery is usually done by making incisions inside the nostrils or a well hidden incision at the underside of the nose. It also corrects breathing problem caused due to the unstructured nose or crooked nose. If you desire to have more symmetrical nose then one should remember that results may not be perfect as one thinks of.

Facial appearance improvements with other implants like cheeks, jaw may show good result of the surgery.

Myths related to Nose Job Surgery NY:

Nose job surgery ny is one of the safest forms of surgeries and this is due to the new and most modern technological methods used in it.

However there is some confusion about this surgery and one must take care to discuss it with their surgeon before making the final decision and they are as follows.

ï,§ Nose surgery is a painful surgery.

ï,§ It takes time to heal

ï,§ Not a safe surgery.

ï,§ It may cause dark blemishes

§ Every one can't afford to take this surgery

The other surgeries which require the implants, cannot be done along with the nose surgery.

So one should take into account all the above things and get clear and complete details before

Taking the surgery and once you are satisfied with every detail and confident of it,

Conclusion:

Nose job surgery ny is the more common surgery which is preferred by many as effective facial feature is of main concerned to everyone now a days. As nose is one of the main enhancing parts on face, many take up the nose surgery to add an attractive look to their faces.
