Hair and Beauty salon equipment by [Jesse](#)

Article published on February 28th 2012 | [Health](#)

If you are looking for a great new business to start up then why not consider a hair and beauty salon? All you really need to invest in to start a hair and beauty business is some hair and beauty salon equipment and this is a perfect way to start earning your money and being completely self reliant.

Running a business is an incredibly rewarding feeling and it feels truly great to be making money for yourself rather than for a faceless corporation. You are no longer a cog in the machine but rather a captain of industry and you will reap the greatest rewards as such. Hair and beauty meanwhile is the perfect industry to get started in as it is always in demand and as it has low overheads with high returns.

To begin you simply need to invest in hair and beauty salon equipment. To begin with you won't need much. You will need mirrors, a gown to protect the customer from too much hair, a spray bottle, various scissors, combs and razors and gels and shampoos. With this basic hair and beauty salon equipment there is then nothing to stop you from starting your business from the comfort of your home. This is ideal because it means you can run your company while at the same time working in your current job. You don't have that scary process of having to quit your current job in order to start chasing your dream – instead you can start offering to cut your neighbors' hair, your friends and your family. Offer them a cheap price and do a good job and soon word will start to spread and more and more people will start to request you to cut their hair. Your only investment was the hair and beauty salon equipment and now you have a small business running.

Once this gets enough to supply you with a decent income then you can try renting a store where you can provide your service. This will instantly increase your clientele as people will walk past and come in for a go. Make yourself stand out with a good design, great deals and additional services. At the same time you will now need to invest in more hair and beauty salon equipment and the more you invest at this point the greater the number of clients you will attract. In short you need to be able to offer the full range of services so look into getting professional chairs to raise and lower your clients as necessary (and to keep them comfortable), hair driers, perming machines, dying equipment etc. This way people will come to you to get services they can't elsewhere and because when they look through the window it will be obvious that you are fully kitted out.

There are then other ways you can increase business and get more return on your investments. For instance you should consider running a website and you'd be surprised how many people this can drive to your stores if you rank well for keywords. Meanwhile you should consider making loyalty cards and other incentives to get return visitors.
