It is but true that treatment/purification of water is like any other treatment associated with your health. This implies that you should not just buy any water filter that you come across in the market or those available via direct sales. You first need to know what is wrong with your water before you treat/purify it. How do you know what is wrong with your tap water. Send a sample to the nearest lab. Depending upon the water input quality, you will be recommended with the right water filter. You will then know about the right technology to purify the water. So, if your water is high in TDS, you will be suggested to use an RO system, if more of micro organisms then UV water filter, and the list goes on. Millions bank upon the Eureka Forbes water purifier. Eureka Forbes has water filter of every mechanism for every water filter. Then there are blend mechanisms as well. If you enter the world of AquaSure Eureka Forbes water purifier, you will come across numerous models to choose from. In fact, you will only be spoilt for choices. Here is a list of the complete AquaSure Eureka Forbes water purifier series:

â€¢ AquaSure Eureka Forbes RO: AquaSure Spring fresh DX, AquaSure Elegant RO, AquaSure Nano RO

â€¢ AquaSure Eureka Forbes UV: AquaSure Crystal, AquaSure Elite UV, AquaSure Smart UV, AquaSure Aquaflow Dx

â€¢ AquaSure Eureka Forbes Storage: AquaSure Amrit with Kitanu Magnet, AquaSure Xtra

â€¢ AquaSure RO+UV Water Purifier.

Not every AquaSure Eureka Forbes water purifier requires electricity to run. There are low budget systems, especially in the storage category, as aforementioned. They do not require electricity or running water. What about consumption of electricity in the electric water filter from Eureka Forbes? Well, it is negligible, especially if you compare it with any other electric equipment in your house. AquaSure comes with a power consumption of 25 watts. In every 40 hours, only 1 unit current is used and with this 1 unit, you can purify 4800 litres of drinking water. If you use 15 litres of purified water from your AquaSure Eureka Forbes water purifier per day on an average, you will requires 7300 litres of water per year. Calculate the consumption of electricity for the whole year for your AquaSure water filter. It comes to approximately 1.52 units! Well, this is not the exact figure for every Eureka Forbes RO or any other water purifier from this company. Power consumption may vary slightly for the different models.

Eureka Forbes RO water filter comes with activated carbon or what is called pre carbon treatment. As TFC spiral is the RO membrane used in every Eureka Forbes RO filter, pre-carbon treatment is incorporated. TFC cannot treat chlorinated water. Activated carbon checks chlorine as well as its by products not to mention reducing organic chemicals, bad smell, colour, pesticides, lead, and other impurities. This and the multi-stage purification process ensure that purification effectiveness is guaranteed in every Eureka Forbes RO system.
