The Woodlands Window Cleaning and Pressure Washing Co. -- are You Working with the Right Company? by [Monique Davis](#)

Article published on May 15th 2012 | [Home Improvement](#)

Whether you're trying to get your home in tip-top shape so that you can sell it, you're trying to make a good impression on the big client that's coming to your office for the first time, or you simply want to make your home sparkle like new, the right Woodlands window cleaning company can help.

But as The Woodlands, Texas, grows, so does the number of window cleaning companies. So, how do you know if you're working with the best one?

Here's how you can tell if The Woodlands window cleaning company you've hired is one of the good ones:

### 1. They offer affordable prices

There are plenty of luxury homes in The Woodlands, but that doesn't mean a pressure washing in The Woodlands should have to cost you an arm and a leg!

In addition to offering prices you can feel comfortable with, a good Woodlands window cleaning company will throw in some freebies -- like cleaning the screens on your windows, along with the outside tracks that are full of dirt. If a company tries to charge you extra for things like that, you're working with the wrong one!

### 2. They love The Woodlands as much as you do

Let's face it -- if you live in The Woodlands, you're awfully lucky. This is a beautiful area! A good Woodlands window cleaning company will take pride in getting your windows spotlessly clean, if for no other reason than they want you to be able to look out at everything that your neighborhood has to offer, without spots and dirt getting in the way!

### 3. They offer a number of options

Pressure washing in The Woodlands doesn't just have to apply to windows. After all, The Woodlands is chock full of porches, decks, bricks, pathways, and fancy siding that all need to be cleaned, too!

That's why a good Woodlands window cleaning company will be able to handle virtually any cleaning job you throw at them. And, they'll have enough expertise to know that certain materials -- like your bricks -- can't withstand a strong power washer. A good company will know how to adjust its equipment so that your stuff gets cleaned. That way, your entire house can get a pick-me-up!

### 4. They offer custom service

A good Woodlands window cleaning company will make things as easy on you as possible -- even if it means coming up with a custom plan to get everything done just the way you want it. For example, if you need things pressure washed in a specific order, or you need things cleaned on a specific day and time, a good company will be happy to accommodate you!
