Marmoleum may be costly next season, Hurry till it's still cheap [By M.](#)

Article published on December 14th 2011 | [Interior Design](#)

Decorating or covering the floor was always in fashion. People love to cover their floors with different carpets and other floorings. There are varieties of carpet and flooring. Their selection should be done with utmost care. Your carpet and flooring should reflect your taste, so special care should be given to it. Carpet and flooring gives plenty of choice to its users. There are luxurious carpets to simple carpets available in the market, to suit every budget. There are varieties of flooring available. Some of most common one are ceramic flooring, porcelains tile, hardwood flooring. These flooring are durable and also economical. They require minimal maintenance. These flooring are often scratch resistant and go on for years with little care. Besides, adding beauty to your home, carpet and flooring also keeps your home warm.

Marmoleum is the merging and quite popular type of flooring, which is used nowadays. These floorings have multiple advantages. Unlike other flooring they are recyclable. Marmoleum flooring is fully organic flooring. They are made from all natural and organic products like linseed, jute, wood flux etc. If you really want to contribute your share towards pollution free environment, then go for marmoleum, for it helps in lowering the green house gas emission and thus making the building cool and pollution free. These floors give you warmer feeling when you walk on them. It is also economical and totally recyclable. They can be recycled to make new items. It has high resistant power.

Marmoleum is anti VOCs or volatile organic compound. These are certain harmful gases, which are toxic and great danger to health. These gases have impact especially on those who are prone to allergy and have sensitive skin. Marmoleum is also intensively encouraged by government too, to protect the environment. If you come under the bracket of environmental conscious people, go for marmoleum, they have their own share, to maintain environmental harmony.

Marmoleum floors are available in multiple design and pattern. There are marmoleum floorings for all budgets. It has high quality luxurious floorings to simple ordinary ones, used just to cover floors. Marmoleum flooring is becoming favorite not only for the domestic use but for commercial use too. It is anti allergic, anti bacterial property, generates interest in the people, to go for it. It also has anti toxins, anti Formaldehyde and anti Asbestos property. Installing marmoleum floors is also easy and it does not require much time to clean it. A whole new look can be given to your house, if you install marmoleum flooring in it. They are recyclable, which are re-engineered to create new floors with different colors and designs but probably with the same component.

Natural wool carpet is always considered a sign of luxury. They are warm, durable and easy to maintain. These carpets not only give good appearance to your home but they have environmental benefits. Natural wool carpet is renewable, decomposable and sustainable. Since they are not made from petrochemicals, they are non-toxic.
