Tackling a Blocked drain London by [James Blee](#)

Article published on July 27th 2012 | [Marketing](#)

It is common for all kinds of properties to suffer from a blocked drain in London and this problem should be dealt with as soon as it is noticed to avoid further damage and potential health risks and to carry out any necessary liquid waste removal. Companies who offer services to clear blocked drain London problems should provide these services to commercial, industrial, domestic and environmental customers who require their assistance. A blocked drain in London is a very common problem and is something that hundreds of homes and businesses will suffer from every single day. Most drain problems are very easy to rectify and they should be dealt with by professional drainage solutions companies. Everyday items like toilet paper, baby wipes, fat, grease, tissues, sanitary towels, hair and small objects like toys are the common causes of a blocked drain London.

Often specialist equipment is required to fix a blocked drain in London and it is professional blocked drains companies who will have this equipment. They will have high pressured jets to try and dislodge whatever is blocking the drain. If this doesn't fix the blocked drain London then they may use CCTV systems which they feed into the drain to see what is causing the blockage. Once they know what it is they can go about fixing the problem. In more severe cases a blocked drain can be caused when a drain collapses or has a hole in it. If this is the case then a new section of drain will need to be put in place to resolve the blocked drain London problem.

Another job that some drainage companies will undertake is liquid waste removal. Liquids of any kind that have been spilled or that are coming out of a drain may need to be pumped away into safe containers and removed as they could pose a risk to people's health if they aren't cleaned up responsibly. Often as result of a blocked drain London a liquid waste removal company will be needed to clean up the mess. The typical services that a blocked drain London and liquid waste removal company will also undertake are flood response, septic tank issues, drilling waste removal, environmental cleaning, high pressure jetting, industrial cleaning and many other blocked drain London related services.
