How to share videos to websites online by [Desiree](#)

Article published on January 10th 2012 | [Software](#)

As we know, more and more video sharing websites have come out day by day such as YouTube, Metacafe, Break, Google Video, Yahoo Video, Rewer, Vimeo and even the most famous online websites YouKU, Tudou in China.

On these video sharing websites, thousands of viewers from all over the world can freely and easily share all kinds of videos anytime anywhere. They also make it possible and easy to browse, find and watch any loved streaming movie. All you need to do is to keep your Internet connections well.

Moreover, these video sharing websites give you a wonderful place to show yourself. You can share a clip of your favorite movie, an important newscast, a how-to video or just some memory moments easily. You need some smart tool to upload your videos to these video sharing websites. VideoFlick published by BlazeVideo, Inc. is the best program I have ever tried to upload my videos to YouTube, Tudou and YouKU.

This little tip will introduce you how to share videos to website online with VideoFlick step by step.

First of all, download VideoFlick from BlazeVideo, Inc. Then follow 2 steps below to upload your videos to YouTube, YouKu or Tudou.

Step 1. Launch VideoFlick and click "Import Pictures/Videos" to load your videos that you want to share online.

Step 2. Upload videos to YouTube, YouKu or Tudou.

Click "Share" button on the quick-launch bar to turn to "Online Share" box.

Then select the target website where you want to share your videos. VideoFlick offers 3 proposed websites YouTube, Tudou and YouKu for your choice.

Enter your current website account such as username and password, click OK to get started.

What? You want to share pictures online too? Just a piece of cake! VideoFlick enables you to upload photos to Flickr, one of the world biggest picture sharing websites.
