If in the horde of operating systems, Microsoft Manages to keep the largest share i.e. 91 percent in its favor then there is definitely something substantial. Whatâ€™s that? This can be a million dollar question that helped the brand to carve a niche for itself in the consumersâ€™ intellect. Beyond doubt, there is strategy, planning and incessant hard-work, but there is one thing more, and thatâ€™s to give more, to walk extra miles and to come out of the expectation curve.

Still itâ€™s pinching your mind? Find it yourself. What you do when your Windows-based system is not in its sound state, say it takes away your breath when you have turned it on, flashes errors, webpages become distorting, and the performance is not at all the same what you used to get. Some errors can put you in dilemma as where to find the crux, particularly when attached devices say webcam or printer become unresponsive. All this contribute to the frustration quotient only, and would have made the situation rather worse in the absence of Microsoft Support. The online portal embraces all make and Model of PCs or laptops or printers, whether they are in or out of the warranty. Microsoft Certified Professionals can make their way to your door virtually through the remote Internet connection, and with no delay. All that you have to do is to call on its helpline number and allow experts for the remote-session, and soon the problems would be a thing of past.

Microsoft Fix It Center is another abode, where you have to just surrender your computer to the cloud. Actually this is also an online helpdesk that automatically comes into rescue with its customized solution whenever wherever. Whether there is issue with Windows, Office Suite, Internet Explorer, Windows Live, Xbox, Visual Studio, or others, you can rely on the provided solution, as what it does is apparently visible in no time. For effectual result you can create an online account with the portal by submitting essential requirement pertaining to system and contact information, and at the time of any conflict Microsoft cloud will assess the entire system configuration and encountered issues to provide you with the desired solution.

Apart from the tech support services Microsoft does empower users with diverse repair and maintenance tools, and every version of Windows has witnessed the benevolent approach. Windows Control Panel holds the tools like Action Center, Backup and Restore, Network and Sharing Center, Performance Information and Tools, Troubleshooting, etc. that can help you to fix most of the computer issues in a quick and easy manner. Each of these tools can be further explored for specific functionality or task as per situation, and in most of the cases administrative credential is must.

You can also manipulate security settings through the Windows Firewall or Windows Security Essentials. Windows Update or Microsoft Update is an important portal that keeps your machine in sync with the latest security, driver or software update thereby helping you to proactively fight with Windows related issues. Thus, you are getting richer with time, and the only thing which you have to do is to exploit these repair tools. Now, its up to you either go with live technical support from Microsoft Help portal or use your common sense.
