"I uploaded my Full Metal Alchemist videos to my Mac Book, and they are displayed as VOB files (DVD Video). There are some unnecessary clips on the videos that I don't need, so to reduce the space it takes up, I need to cut the clips using a program. iMovie will not import these type files. Is there a converter for Mac to get these VOB files compatible with iMovie? What files are compatible with iMovie?"

Some Mac users try to import VOB files directly to iMovie for editing, only to find that these VOB files in Video_TS folder just grey out. To edit VOB files in iMovie (iMovie HD, iMovie 08, iMovie 09, or iMovie 11), you need to convert VOB files to iMovie friendly format first.

VOB is the container format in DVD-Video media which typically stored in the VIDEO_TS folder. can contain digital video, digital audio, subtitles, DVD menus and navigation contents multiplexed together into a stream form. VOB is not a read format for iMovie who usually recognize MOV, MP4, DV format.
