The Specifications of Rbc7 Battery by [David Bens](#)

Article published on November 25th 2011 | [Technology](#)

The number of electrical equipments that is used in every household has made people dependent on them and for continuing the pleasure of using them we need uninterrupted power supply. This will make your life smooth and that is possible through a UPS battery system. That is why you need replacement battery cartage for your UPS to give them a new life. rbc7 battery can be a good choice for the same which comes with two years warranty.

This battery has been quite a rage for the simple reason that it is easy to install and lasts long. This is a plug and play battery and it is a hot swap battery too. This is a lead acid based battery which does not require any kind of maintenance. Though the warranty is for 2 years the battery can last from 3 to 5 years. This is 7.13 inches in length, 6 inches in width and 6.54 inches in height. The weight is not as much as other batteries and the price falls within the budget.

There are some dealers in battery that sells rbc7 battery of different specifications. You can buy them from a nearby store or can even order online. These batteries are known for its easy set up and give you a hassle free experience with it. Though this is a replacement battery it works like a new one. When you order the battery it will arrive fully charged and you can use it instantly. If you go to purchase a new one you may need to spend a lot of money on that. Using a replacement battery will not only save money it would also be an environment friendly deal. With rbc7 battery your UPS battery will be cost effective while giving uninterrupted power supply
