Traveling to and from London Stansted Airport by [Jocasta Marvin](#)

Article published on July 4th 2012 | [Travel](#)

London Stansted enjoys the status of being the fourth biggest airport in terms of total passenger traffic. It has the capacity of managing around 25 million passengers in a year. The airport is located at a travel distance of approximately 48 kilometers (30 miles) towards the northeast of Central London in Stansted Mountfitchet in Essex County. The airport has a beautiful building with a floating roof. It was designed by Foster Associates and was constructed with the technical instructions of a structural engineer, Peter Rice. The airport witnessed a total of 18 million passengers passing through its gates in the year 2011.

The main reason for its popularity among public is that it is a home to majority of low cost carriers of UK. Stansted is also a home to the low-cost giant, Ryanair. The facilities at the airport are perfect for just about all kinds of passengers which including disabled passengers, families with kids and solo travelers. The airport also offers special facilities for corporate class passengers with executive lounges, priority check-ins and other special facilities. The air traffic control tower of Stansted Airport was the highest building in UK when it was constructed and even today is among the tallest buildings of the country with a height of 60 meters. Stansted airport offers all kinds of ground travel and transportation facilities to its passengers.
